

FIG.1

A cross-sectional view of a ring-shaped member 23. It consists of an outer ring 23b and a central circular region 23a. The central region 23a is filled with diagonal hatching lines.

A cross-sectional view of a ring-shaped component, labeled 24. The component has a central circular hole, labeled 24a, and an outer circular edge, labeled 24b. The entire ring is filled with diagonal hatching lines.

A circular diagram representing a 14-sided die. The outer ring is divided into 14 segments, each containing the number 2. The inner ring is divided into 7 segments, each containing the number 1. The segments are labeled with letters A, B, C, D, A', B', and C' around the perimeter. An arrow points to the outer ring with the number 14.
